

Resimac Marine Repair Kits 1/ 2/ 3/ 4....

Resimac Marine Repair Kits 1, 2, 3 and 4 have been designed to be used on board vessels and allow the user to perform a wide range of repairs to leaking pipes, tanks, pumps and process equipment.

The kits contain a wide range of epoxy metal repair pastes and fluids which are capable of rebuilding metallic surfaces subject to erosion, corrosion, chemical attack and impact. The kits are packed in heavy duty tool boxes and contain all the accessories required to perform a successful application.

The Marine Repair Kits include -

- High performance epoxy paste grade materials
- Fast curing epoxy materials for emergency repairs
- Surface tolerant coatings
- High temperature & abrasion resistant coatings
- Underwater coatings and repair materials
- Bureau Veritas approved products

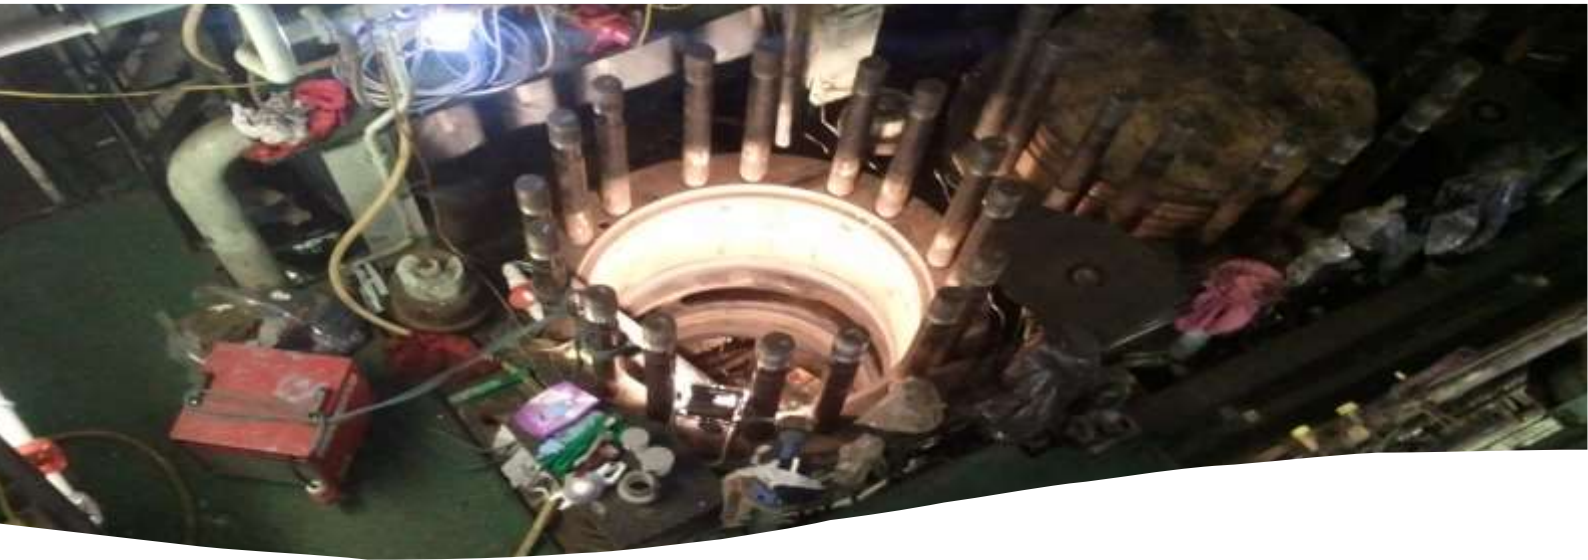

Benefits to the user include-

- Solvent free technology—no flammable fumes
- Simple and easy to use
- Minimal surface preparation required
- Proven track record in the marine industry
- Suitable for confined spaces
